About Me

A passionate and motivated, Logical thinker, Android and Web developer who loves to make very beautiful app with robust & scalable & modular, codebase for fast and user friendly experience.

I have been an Android developer for more than 2 years made over 15 apps, some which have very complex designs and features that required very good logical and problem solving skills to implement

I love solving real world programming problems that face me daily durring development of web and mobiles apps

Hackathon

I have also participated in HackaSuly2018 the first hackathon in Sulaimani Kurdistan, the event was sponsored by very popular and knowin companies in Kurdistan such as Avesta group and many more and I was the winner of 1st place

Certificates
